jQuery 3.x

The integrity and crossorigin attributes are used for [Subresource Integrity \(SRI\) checking](#)

(<https://www.w3.org/TR/SRI/>). This allows browsers to ensure that resources hosted on third-party servers have not been tampered with. Use of SRI is recommended as a best-practice, whenever libraries are loaded from a third-party source. Read more at [srihash.org \(https://www.srihash.org/\)](https://www.srihash.org/)
